Short presentation

Primary research regards ecology, evolution, systematics and ecophysiology of toxin producing diatoms, a genus of planktonic microalgae.

PhD project is primarily on assessing the interaction between species of *Pseudo-nitzscha* (A pennate toxic diatom genus) and their primary grazers, copepods.

Qualifications

Biology, Cand. Scient

Award Date: 30 Jan 2019

Employment

PhD Student

Research

København Ø

30 Nov 2019 → nu

PhD fellow

Research

København Ø

1 Dec 2019 → 28 Feb 2024
